

Snowplows and Lawn Damage

Lawn damage during the winter season can be an unfortunate consequence of snow removal. To prepare for future storms and keep storm drains open, it is necessary for the plows to push the snow beyond the edge of the road. If you must install snow markers in the Town right-of-way, please keep them at least two feet from the edge of the road. This will keep them from being knocked down from the weight of the snow as the plow comes through.
