LEAD SERVICE LINE STATUS/SURVEY

A letter was recently sent to homeowners in Rotterdam and Rotterdam Junction regarding the status of residential service lines. Below is important information regarding this letter.

FAQ's:

What prompted this inventory and what is the result once the information has been gathered?

The survey was launched to gather data to fulfill the federal requirement of each Public Water System to maintain a lead service line inventory for both residential and municipal portion of the water service lines.

Residents of Water Districts 3 and 4 (Rotterdam Jct. area) can scan here to access the survey:

Residents of Water District 5 can scan here to access the survey:

Do I need to complete the survey if I have a private well for drinking water?

No

Should I be concerned about lead in my tap water?

The town is required to test for lead in their existing water distribution system in various locations throughout the water system as per NYSDOH.

What do I need to do if I already completed the survey?

If you have already completed the survey, you do not need to do it again.

What do I need to do if I received this letter?

If you haven't completed the online or paper survey, view the Town website to complete the Lead Service Line Inventory Survey (or scan the appropriate QR code above). This is the same survey that was sent out via postcard during the summer. The survey and information needed to determine the material of your pipes are included on this webpage: www.rotterdamny.org/tools/notices

*If you do not have access to a computer or smartphone and need assistance in doing this or would like a Town Representative to help identify your service line, please contact 518-355-7575 ext. 322 to request an appointment or send an email to getleadout@rotterdamny.org
